

Social & Solidarity Economy for a Controlled & Inclusive Urbanization of African Cities: Case of Kampala

*By Edison Masereka – Manager Business
Development, KCCA*

Geneva, June 26th, 2019

Together we can transform Kampala city

Kampala City – Brief Facts

Popn: 1.5m (GKMA: 3.5m)

Urbanisation Rate; 5.2% per annum

Projection: 8m by 2030 (BAU)

Size: 189Km²

Administrative: 5 Divisions

The City Economy

	Greater Kampala	Share of National
Population (Million)	4	10.70%
Total GDP US\$ Billion	7.3	31.20%
Total Employment (million)	2.2	9.50%
Private Consumption (US\$ billion)	5.5	29.80%
GDP Per capita (\$)	1,832	626

Kampala – Urban Development Challenges

- ❑ Disconnected & costly built environment – infrastructure + land constraints
- ❑ High production costs occasioned by land prices + complex tenure system limiting access to land
- ❑ Access to affordable finance (interest rates of up to 23%)
- ❑ High economic and social inequalities
- ❑ Inadequate skills particularly for medium & large firms
- ❑ High rates of underemployment especially among the youth
- ❑ High levels of Informality – sector represents about 57% of all jobs and 80% of self employment
- ❑ Waste management and environmental degradation
- ❑ Acute lack of decent Housing leading to large informal settlements with poor access to services

Kampala – Urban development challenges

The Place of SSE in Kampala's Sustainable Development?

- ☐ Can the SSE provide a complementary development paradigm? Can the SSE provide solutions to the social, economic & environmental challenges for a controlled and inclusive urban eco-system in Africa?
- ☐ Do cooperatives present a potential to address the development challenges facing the Cities African e.g.;
 - Lack of decent work for the urban poor/informal economies?
 - Poor access to local regional and international markets for small producers?
 - Social protection for vulnerable groups i.e. health insurance, elderly
 - Confront the threats of Environmental degradation

Evolution of the Social & Solidarity Economy

- ❑ Although poorly documented, the concept of SSE in Africa can be looked at as an ecosystem of practices which have existed for many years.
- ❑ Traditionally, SSE practices were driven by ideology and communal commitments eg “Bulungi Bwasi” (**voluntary communal work**) in Buganda
- ❑ However, currently SSE is often driven by economic hard times & need for survival as a response to market & policy deficiencies of the transitional economic models of the 1990s.
- ❑ Recent trends are upward largely based on expansion of savings & credit cooperatives
- ❑ As such people have turned to own collective solutions to create jobs, food, housing, credit, savings, social etc.

Contribution of SSE to the Kampala economy

	No. of Establishments	US\$	Total Business Registration (COBE 2016)	SSE as % of Business registrations
No. of Cooperatives	596		133,663	0.4%
Membership	143,782			
No. of people Employed (Direct)	2,380		379,257	0.6%
	UgX	US\$		
Share Capital	34,587,918,166	9,223,445		
Savings	89,206,430,764	23,788,382		
Loans	118,158,328,740	31,508,888		

Direct- employees, government staff, training colleges etc.

Indirect – members who own micro enterprises or self employed

Observations/Constraints

Reconstruction of an effective SSE movement in the country remains challenging;

- ☐ Economy wide/ multiplier effects – poorly document & difficult to estimate
- ☐ Diversification is limited – dominated by savings & credit cooperatives credit (SACCO form Over 90%). Limited diversification along the value chains i.e. inputs, products, access to markets, storage, transportation, housing societies, consumer (e.g. fair trade)
- ☐ Dominated by employee based SACCOs
- ☐ Social protection- only limited funerals & weddings. unemployment benefits, health insurance, support to the elderly etc.
- ☐ Advocacy- limited bargaining power to inform policy
- ☐ Gender equality
- ☐ Environment protection – has not been seen as a top priority save for a few fair trade partnerships + organic urban agriculture. This could help introduce environmental awareness & new farming techniques

Some policy responses – Case of KCCA sweepers SACCO

Membership: 4000

- ❑ Constitutes women & youth who sweep the streets
- ❑ Contracted using preference schemes provided in the National Procurement Law
- ❑ Provided with Ugx 800m (US\$200,000) as seed capital.
- ❑ KCCA provides tools, office space, computer & Accountant for the cooperative

Scaling up the SSE – what needs to be done

- ☐ Strengthen policy & institutional capacities at local level to support growth of SSE
- ☐ Better documentation of the SSE & its contribution to the local economy and social impact.
- ☐ Networking and partnerships to extent and deepen the SSE sector.
- ☐ Capacity building for all players in the sector to increase understanding of the SSE to inform policy, management practices, leadership and measurement of impact.
